

EBENEZER ALLEN

“I empower businesses, their employees, and leadership to avoid the threat of cyber risk and to recover quickly without lingering damages.”

EBENEZER ALLEN

Hire Ebenezer Allen, President of Allen Forensics, Inc., for your next virtual or hybrid meeting. His riveting presentation on the real-world dangers of cyber security or the lack of it, will have your audience both shocked and relieved they attended this event. Allen engages audience members to experience what it is like to have someone steal your business, your identity, even your life in fractions of a second.

WHAT TO EXPECT

Here's what your audience can expect to take away from this compelling experience. Ben will demonstrate for attendees:

- How to specifically recognize prevailing vulnerability to cyber attack
- Available tips, tools, and techniques that best mitigate major security breaches and longterm nightmares.
- Finally, he'll demonstrate specific solutions to individual security concerns, as well as how to handle major corporate security breaches.

Ben outlines ways to build a culture within your organization of employees who will protect one another, while protecting your workforce.

BIOGRAPHY

Ben Allen has worked with Fortune 500 companies for a decade. He's a respected private investigator in the state of Texas and holds a certificate of Professional Private Investigations from the University of North Texas and has completed studies in Human Resources at Cornell University. He's a certified fraud examiner and holds a Master's Degree in Business Administration from Lincoln University in Oakland, California. He's currently pursuing his doctorate in Psychology. His book on **10 Lifesaving Steps to Protect Your Business and Your Family** is due to be released in Summer of 2021.

WHAT OTHERS SAY

"I thought I knew a lot about my digital footprint until I discovered someone has taken a mortgage loan in my name... Thanks to Ben I caught the issue early enough."

- Stefanie Spade, Former US Marines

"Ebenezer Allen not only taught me how to clean up my private information from the Internet but helped me to get it done."

- Donna Bennett, Former FBI Agent

DID YOU KNOW?

A cyber attack is committed every 39 seconds in the U.S. Cyber security is more than IT.
